JOURNAL OF ELECTROANALYTICAL CHEMISTRY

# Subject index

Acetyl diphenylsulphides
Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones (Constantinescu et al.) 211
Acetyl sulphones
Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones (Constantinescu et al.) 211
Acid solutions
Comparative electrochemical behaviour of $CO_2$ on Pt and Rh electrodes in acid solution (Marcos et al.) 91
Acrylamide
Electropolymerization of acrylamide at high current density in aqueous media (Otero, Cantero) 75
Adsorption kinetics
Adsorption of cyanide-containing species from dicyanoaurate solutions on gold electrodeposits (Poškus, Agafonovas) 279
Aliphatic alcohols
Electrode reactions of nitroxyl radicals. XI: Coulometric experiments on the oxidation of aliphatic alcohols by oxoammonium cations (Chmielewska et al.) 167
Analytical solutions
Formal solution for the potential step problem with linear adsorption: numerical approach for non-linear isotherms (Krulic, Fatouros) 273
Arsenic
Poisoning effects of arsenic species on H adsorption and kinetic behaviour of the $H_2$ evolution reaction at Pt in KOH solution (Gao, Conway) 261
Atrazine
Electrochemistry of *s*-triazine herbicides: reduction of atrazine and terbutylazine in aqueous solutions (Pospíšil et al.) 189
Auger electron spectroscopy
On the structure of the Pt(100) and Pt(110) electrode surface in iodide solutions (Albers et al.) 99

Biocatalysis
Highly selective biosensing of glucose utilizing a glucose oxidase + rhodium + Nafion® biocatalytic–electrocatalytic–permselective surface microstructure (Wang, Wu) 287
Biosensors
Highly selective biosensing of glucose utilizing a glucose oxidase + rhodium + Nafion® biocatalytic–electrocatalytic–permselective surface microstructure (Wang, Wu) 287

Carbon ceramic composites
Electrochemical characterization and morphological studies of palladium-modified carbon ceramic electrodes (Gun et al.) 57
Catalyst poisons
Poisoning effects of arsenic species on H adsorption and kinetic behaviour of the $H_2$ evolution reaction at Pt in KOH solution (Gao, Conway) 261
Charge transfer
Non-reversible charge transfer and mass transfer: Methodology for experimental characterization without theoretical models (Vieil, Miomandre) 15

Clay modified electrodes
Anionic clay modified electrodes: electrochemical activity of nickel(II) sites in layered double hydroxide films (Qiu, Villemure) 159
CO
On the electroadsorption of CO on Pt in methanol and acetonitrile, and the influence of residual oxygen (Cuesta, Gutiérrez) 331
Coaxial probe
Measurement of membrane conductivities using an open-ended coaxial probe (Gardner, Anantaraman) 67
Cobalt oxyhydroxide films
Analysis of hydration number in cobalt oxyhydroxide films using the quartz crystal microbalance (Matsumoto et al.) 45
$CO_2$ electrochemistry
Comparative electrochemical behaviour of $CO_2$ on Pt and Rh electrodes in acid solution (Marcos et al.) 91
Conducting polymers
An in-situ infrared study of the immobilisation of anions in conducting polymers (Jones, Kalaji) 323
Conductivity
Measurement of membrane conductivities using an open-ended coaxial probe (Gardner, Anantaraman) 67
Conductometric microsensors
Ion-selective conductometric microsensors based on the phenomenon of specific salt extraction (Shul'ga et al.) 305
Coulometry
Electrode reactions of nitroxyl radicals. XI: Coulometric experiments on the oxidation of aliphatic alcohols by oxoammonium cations (Chmielewska et al.) 167
Cyanide-containing species
Adsorption of cyanide-containing species from dicyanoaurate solutions on gold electrodeposits (Poškus, Agafonovas) 279
Cyclic voltammetry
Computer simulation of a square scheme with reversible and irreversible charge transfer by the network method (González-Fernández et al.) 39
Derivatization of surfaces and self-inhibition in irreversible electrochemical reactions: cyclic voltammetry and preparative-scale electrolysis (Bhugun, Savéant) 127
Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones (Constantinescu et al.) 211

Deuterium
Absorption–desorption of deuterium at Pd95%–Rh5% alloy. II: neutron emission (Mengoli et al.) 249
Dicyanoaurate solutions
Adsorption of cyanide-containing species from dicyanoaurate solutions on gold electrodeposits (Poškus, Agafonovas) 279
Differential capacity
Potentiostatic differential capacity measurements: frequency limitations (Koehler et al.) 29
Differential electrochemical mass spectrometry
Electroreactivity of isopropanol on platinum in acids studied by DEMS and FTIRS (Pastor et al.) 233

Electric double layer
A description of electrified interfaces based on methods of statistical field theory (Stafiej et al.) 1
Electric percolation
Concentration distribution of conducting species with time resolution in electrochemical undoping process at the polypyrrole-film-coated electrode in the light of electric percolation (Tezuka et al.) 51
Electrified interface
A description of electrified interfaces based on methods of statistical field theory (Stafiej et al.) 1
Electroactive azobenzene
Fabricating electroactive azobenzene self-assembled monolayers and their characterization (Yu et al.) 327
Electroadsorption
Surface electrochemistry of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl-2H-tetrazolium bromide ([MTT]Br) adsorbed on a graphite electrode (Marques et al.) 133
On the electroadsorption of CO on Pt in methanol and acetonitrile, and the influence of residual oxygen (Cuesta, Gutiérrez) 331
Electrocatalysis
Noble-metal-modified glassy carbon electrodes for ethylene glycol oxidation in alkaline medium (El-Shafei et al.) 181
An in-situ Fourier transform infrared study of $CO_2$ electroreduction catalysed by Ni(0)–4,4′-dimethyl 2,2′-bipyridine and Ni(0)–1,10-phenanthroline complexes (Christensen et al.) 195
Highly selective biosensing of glucose utilizing a glucose oxidase + rhodium + Nafion® biocatalytic–electrocatalytic–permselective surface microstructure (Wang, Wu) 287
Electrochemical interfaces
Spectroscopic investigation of electrochemical interfaces at overpotential by infrared-visible sum-frequency generation: platinum in base and methanol-containing electrolyte (Peremans, Tadjeddine) 313
Electrochemically active layer
Electrochemical characterization and morphological studies of palladium-modified carbon ceramic electrodes (Gun et al.) 57
Electrochemical scanning tunnelling microscopy
A study of the Pd/highly oriented pyrolytic graphite electrodeposition system by in situ electrochemical scanning tunnelling microscopy (Tong et al.) 117
Electrochemical undoping
Concentration distribution of conducting species with time resolution in electrochemical undoping process at the polypyrrole-film-coated electrode in the light of electric percolation (Tezuka et al.) 51
Electron transfer
Voltammetry in the presence of ultrasound: can ultrasound modify heterogeneous electron transfer kinetics? (Marken et al.) 335
Electro-oxidation
Noble-metal-modified glassy carbon electrodes for ethylene glycol oxidation in alkaline medium (El-Shafei et al.) 181
Electropolymerization
Electropolymerization of acrylamide at high current density in aqueous media (Otero, Cantero) 75
Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy (Schlereth, Karyakin) 221
Electroreactivity
Electroreactivity of isopropanol on platinum in acids studied by DEMS and FTIRS (Pastor et al.) 233
Electroreduction
An in-situ Fourier transform infrared study of $CO_2$ electroreduction catalysed by Ni(0)–4,4′-dimethyl 2,2′-bipyridine and Ni(0)–1,10-phenanthroline complexes (Christensen et al.) 195
Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones (Constantinescu et al.) 211
Adsorption of cyanide-containing species from dicyanoaurate solutions on gold electrodeposits (Poškus, Agafonovas) 279
ESR spectroscopy
Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones (Constantinescu et al.) 211
Ethylene glycol
Noble-metal-modified glassy carbon electrodes for ethylene glycol oxidation in alkaline medium (El-Shafei et al.) 181

Fourier transform
An in-situ Fourier transform infrared study of $CO_2$ electroreduction catalysed by Ni(0)–4,4′-dimethyl 2,2′-bipyridine and Ni(0)–1,10-phenanthroline complexes (Christensen et al.) 195
Frequency dispersion
Potentiostatic differential capacity measurements: frequency limitations (Koehler et al.) 29
FTIR spectroscopy
Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy (Schlereth, Karyakin) 221

Gas electrodes
Design of solid electrolytes for use with dissimilar gas electrodes (Mukhopadhyay, Jacob) 107
Glucose
Highly selective biosensing of glucose utilizing a glucose oxidase + rhodium + Nafion® biocatalytic–electrocatalytic–permselective surface microstructure (Wang, Wu) 287
Gold electrode
Direct electrocatalytical $H_2O_2$ reduction with hemin covalently immobilized at a monolayer-modified gold electrode (Lötzbeyer et al.) 341
Graphite electrode
Surface electrochemistry of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl-2H-tetrazolium bromide ([MTT]Br) adsorbed on a graphite electrode (Marques et al.) 133

H adsorption
Poisoning effects of arsenic species on H adsorption and kinetic behaviour of the $H_2$ evolution reaction at Pt in KOH solution (Gao, Conway) 261
Halide ions
Competitive photoanodic oxidation of halide ions and water at a $TiO_2$ thin film electrode: an in situ photocalorimetric and analytical study (Schaaf et al.) 173
$H_2$ evolution reaction
Poisoning effects of arsenic species on H adsorption and kinetic behaviour of the $H_2$ evolution reaction at Pt in KOH solution (Gao, Conway) 261
Highly oriented pyrolytic graphite
A study of the Pd/highly oriented pyrolytic graphite electrodeposition system by in situ electrochemical scanning tunnelling microscopy (Tong et al.) 117
Hydration number
Analysis of hydration number in cobalt oxyhydroxide films using the quartz crystal microbalance (Matsumoto et al.) 45
Hydrocarbon detoxification
Surface-enhanced Raman spectroscopy (SERS) evidence of charge transfer between putidaredoxin and a silver electrode (Reipa et al.) 299
Hydrogen evolution reaction
Spectroscopic investigation of electrochemical interfaces at overpotential by infrared-visible sum-frequency generation: platinum in base and methanol-containing electrolyte (Peremans, Tadjeddine) 313

Immobilisation
An in-situ infrared study of the immobilisation of anions in conducting polymers (Jones, Kalaji) 323
Interfacial electrochemistry
Derivatization of surfaces and self-inhibition in irreversible electrochemical reactions: cyclic voltammetry and preparative-scale electrolysis (Bhugun, Savéant) 127
Iodine absorption
On the structure of the Pt(100) and Pt(110) electrode surface in iodide solutions (Albers et al.) 99
Ionic membrane
Measurement of membrane conductivities using an open-ended coaxial probe (Gardner, Anantaraman) 67
Ion-selective electrodes
Ion-selective conductometric microsensors based on the phenomenon of specific salt extraction (Shul'ga et al.) 305
Irreversible electrochemical reactions
Derivatization of surfaces and self-inhibition in irreversible electrochemical reactions: cyclic voltammetry and preparative-scale electrolysis (Bhugun, Savéant) 127
IR spectroscopy
An in-situ Fourier transform infrared study of $CO_2$ electroreduction catalysed by Ni(0)–4,4′-dimethyl 2,2′-bipyridine and Ni(0)–1,10-phenanthroline complexes (Christensen et al.) 195
Electroreactivity of isopropanol on platinum in acids studied by DEMS and FTIRS (Pastor et al.) 233
IR study
An in-situ infrared study of the immobilisation of anions in conducting polymers (Jones, Kalaji) 323
Isopropanol
Electroreactivity of isopropanol on platinum in acids studied by DEMS and FTIRS (Pastor et al.) 233

LEED
On the structure of the Pt(100) and Pt(110) electrode surface in iodide solutions (Albers et al.) 99

Mass transfer
Non-reversible charge transfer and mass transfer: Methodology for experimental characterization without theoretical models (Vieil, Miomandre) 15
Mathematical models
Computer simulation of a square scheme with reversible and irreversible charge transfer by the network method (González-Fernández et al.) 39
Mediator-modified electrodes
Mediator-modified electrodes for electrocatalytic oxidation of NADH (Gründig et al.) 143
Modified electrodes
Electrochemical characterization and morphological studies of palladium-modified carbon ceramic electrodes (Gun et al.) 57
Modified glassy carbon electrodes
Noble-metal-modified glassy carbon electrodes for ethylene glycol oxidation in alkaline medium (El-Shafei et al.) 181
Morphology surface structure
Electrochemical characterization and morphological studies of palladium-modified carbon ceramic electrodes (Gun et al.) 57
MTT
Surface electrochemistry of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl-2H-tetrazolium bromide ([MTT]Br) adsorbed on a graphite electrode (Marques et al.) 133

NADH oxidation
Mediator-modified electrodes for electrocatalytic oxidation of NADH (Gründig et al.) 143
Neutron emission
Absorption–desorption of deuterium at Pd95%–Rh5% alloy. II: neutron emission (Mengoli et al.) 249
Nickel sites
Anionic clay modified electrodes: electrochemical activity of nickel(II) sites in layered double hydroxide films (Qiu, Villemure) 159
Ni complexes
An in-situ Fourier transform infrared study of $CO_2$ electroreduction catalysed by Ni(0)–4,4′-dimethyl 2,2′-bipyridine and Ni(0)–1,10-phenanthroline complexes (Christensen et al.) 195
Nitroxyl radicals
Electrode reactions of nitroxyl radicals. XI: Coulometric experiments on the oxidation of aliphatic alcohols by oxoammonium cations (Chmielewska et al.) 167
Noble metals
Noble-metal-modified glassy carbon electrodes for ethylene glycol oxidation in alkaline medium (El-Shafei et al.) 181
Numerical methods
Formal solution for the potential step problem with linear adsorption: numerical approach for non-linear isotherms (Krulic, Fatouros) 273

Optical spectroscopy
Cyclic voltammetry, ESR and spectral investigation of the electrochemical reduction of some acetyl diphenylsulphides and sulphones (Constantinescu et al.) 211
Oxidation
Anionic clay modified electrodes: electrochemical activity of nickel(II) sites in layered double hydroxide films (Qiu, Villemure) 159
Oxoammonium cations
Electrode reactions of nitroxyl radicals. XI: Coulometric experiments on the oxidation of aliphatic alcohols by oxoammonium cations (Chmielewska et al.) 167

Palladium
Absorption–desorption of deuterium at Pd95%–Rh5% alloy. II: neutron emission (Mengoli et al.) 249
Passivation
Derivatization of surfaces and self-inhibition in irreversible electrochemical reactions: cyclic voltammetry and preparative-scale electrolysis (Bhugun, Savéant) 127
Study by potential-modulated reflectance spectroscopy of the reactivity of ethanol with the passivating layer on Ni and Fe (Kowal, Gutiérrez) 243
Permselectivity
Highly selective biosensing of glucose utilizing a glucose oxidase + rhodium + Nafion® biocatalytic–electrocatalytic–permselective surface microstructure (Wang, Wu) 287
Phase transitions
Phase transitions in uracil adlayers on Ag, Au and Hg electrodes—substrate effects (Wandlowski) 83
Phenazine
Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy (Schlereth, Karyakin) 221
Phenothiazine
Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy (Schlereth, Karyakin) 221
Phenoxazine
Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy (Schlereth, Karyakin) 221
Photocalorimetry
Competitive photoanodic oxidation of halide ions and water at a $TiO_2$ thin film electrode: an in situ photocalorimetric and analytical study (Schaaf et al.) 173
Platinum catalyst
Spectroscopic investigation of electrochemical interfaces at overpo-

tential by infrared-visible sum-frequency generation: platinum in base and methanol-containing electrolyte (Peremans, Tadjeddine) 313
Poly(*o*-phenylenediamine)
Coupled electrochemical and radiometric study of anion migration in poly(*o*-phenylenediamine) films (Martinusz et al.) 293
Polypyrrole films
Concentration distribution of conducting species with time resolution in electrochemical undoping process at the polypyrrole-film-coated electrode in the light of electric percolation (Tezuka et al.) 51
Potentiostatic measurements
Potentiostatic differential capacity measurements: frequency limitations (Koehler et al.) 29
Preparative-scale electrolysis
Derivatization of surfaces and self-inhibition in irreversible electrochemical reactions: cyclic voltammetry and preparative-scale electrolysis (Bhugun, Savéant) 127
Pt(100)
On the structure of the Pt(100) and Pt(110) electrode surface in iodide solutions (Albers et al.) 99
Pt(110)
On the structure of the Pt(100) and Pt(110) electrode surface in iodide solutions (Albers et al.) 99
On the electroadsorption of CO on Pt in methanol and acetonitrile, and the influence of residual oxygen (Cuesta, Gutiérrez) 331

Quartz crystal microbalance
Analysis of hydration number in cobalt oxyhydroxide films using the quartz crystal microbalance (Matsumoto et al.) 45

Radiometry
Coupled electrochemical and radiometric study of anion migration in poly(*o*-phenylenediamine) films (Martinusz et al.) 293
Reactants' adsorption
Formal solution for the potential step problem with linear adsorption: numerical approach for non-linear isotherms (Krulic, Fatouros) 273
Reaction rates
$CO_2$ Reduction on Rh single crystal electrodes and the structural effect (Hoshi et al.) 309
Redox
Surface-enhanced Raman spectroscopy (SERS) evidence of charge transfer between putidaredoxin and a silver electrode (Reipa et al.) 299
Redox indicators
Surface electrochemistry of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl-2H-tetrazolium bromide ([MTT]Br) adsorbed on a graphite electrode (Marques et al.) 133
Reduction
Anionic clay modified electrodes: electrochemical activity of nickel(II) sites in layered double hydroxide films (Qiu, Villemure) 159
Direct electrocatalytical $H_2O_2$ reduction with hemin covalently immobilized at a monolayer-modified gold electrode (Lötzbeyer et al.) 341
Reduction of $CO_2$
$CO_2$ Reduction on Rh single crystal electrodes and the structural effect (Hoshi et al.) 309
Reversible reactions
Formal solution for the potential step problem with linear adsorption: numerical approach for non-linear isotherms (Krulic, Fatouros) 273
Rh single crystals
$CO_2$ Reduction on Rh single crystal electrodes and the structural effect (Hoshi et al.) 309

Self assembled monolayers
Fabricating electroactive azobenzene self-assembled monolayers and their characterization (Yu et al.) 327
SERS
Surface-enhanced Raman spectroscopy (SERS) evidence of charge transfer between putidaredoxin and a silver electrode (Reipa et al.) 299
Solid electrolytes
Design of solid electrolytes for use with dissimilar gas electrodes (Mukhopadhyay, Jacob) 107
Solution flushing tatics
Anion effects upon upd copper on platinum electrodes: an illustrative coulometric analysis using solution flushing tactics (Wang et al.) 317
Sonovoltammetry
Voltammetry in the presence of ultrasound: can ultrasound modify heterogeneous electron transfer kinetics? (Marken et al.) 335
Specific salt extraction
Ion-selective conductometric microsensors based on the phenomenon of specific salt extraction (Shul'ga et al.) 305
Statistical field theory
A description of electrified interfaces based on methods of statistical field theory (Stafiej et al.) 1
Substrate effects
Phase transitions in uracil adlayers on Ag, Au and Hg electrodes—substrate effects (Wandlowski) 83
Surface electrochemistry
Surface electrochemistry of 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl-2H-tetrazolium bromide ([MTT]Br) adsorbed on a graphite electrode (Marques et al.) 133

Terbutylazine
Electrochemistry of *s*-triazine herbicides: reduction of atrazine and terbutylazine in aqueous solutions (Pospíšil et al.) 189
*s*-Triazine herbicides
Electrochemistry of *s*-triazine herbicides: reduction of atrazine and terbutylazine in aqueous solutions (Pospíšil et al.) 189

Ultrasound
Voltammetry in the presence of ultrasound: can ultrasound modify heterogeneous electron transfer kinetics? (Marken et al.) 335
Underpotential deposition
Anion effects upon upd copper on platinum electrodes: an illustrative coulometric analysis using solution flushing tactics (Wang et al.) 317
Uracil adlayers
Phase transitions in uracil adlayers on Ag, Au and Hg electrodes—substrate effects (Wandlowski) 83
UV–visible difference spectroelectrochemistry
Electropolymerization of phenothiazine, phenoxazine and phenazine derivatives: characterization of the polymers by UV–visible difference spectroelectrochemistry and Fourier transform IR spectroscopy (Schlereth, Karyakin) 221
